(Module from
Scratch)

Docker
Python

Ansible (Playbook
Writing for Automation)

Jenkins (Pipeline
Configuration)

AWS (Amazon EKS,
Amazon Route 53, ELB
, AWS Tower AFT, s3,
IAM, VPC, EC2,
Cognito, API
gateway, RDS, Secret

Experienced Cloud Infrastructure Engineer with **3.6 years** with a strong background in designing, provisioning, and automating cloud-native and hybrid environments across AWS and Azure platforms. Proven ability to collaborate with application teams to migrate critical workloads from on-premises infrastructure to cloud environments, ensuring high availability, security, and scalability. Expertise in developing Terraform modules from scratch to manage a wide range of cloud services and in building robust disaster recovery (DR) environments for enterprise applications. And committed to delivering impactful results through agile methodologies.

Work History

2024-03 -
2025-06

DevOps & Cloud Infrastructure Engineer | Terraform | AWS | Ansible | Jenkins | Monitoring | DR Planning

TCS, Bhubaneswar, India, BFSI Canada (Manulife)

Key Responsibilities & Achievements:

- **Cloud Migration & Collaboration:**
 - Worked closely with **application teams** to plan and execute seamless **migration of on-premises applications to cloud platforms (AWS & Azure)**.
 - Conducted environment assessments, network mapping, and resource provisioning to support application compatibility in the cloud.
 - Ensured minimal downtime and performance optimization during migration.
- **Terraform Infrastructure Provisioning:**
 - Designed and built **modular Terraform code** to provision and manage infrastructure components across both **AWS and Azure**.
 - Services covered include:
 - **AWS:** EC2, VPC, S3, IAM, EKS, Route 53, ELB, Cognito, API Gateway, RDS, Secrets Manager, Certificate Manager, ECR, AWS Control Tower (AFT).

Manager, Certificate
Manager , ECR)

ITIL

Azure (Azure Virtual
Network, Azure Virtual
Machines (VMs),
Azure Kubernetes
Service (AKS), Azure
App Service, Azure
Load Balancer, AKV)

CyberArk Safe, JFrogg
Artifactory

PowerShell, Linux

Python, YAML

Agile, JIRA

Git hub, Flux CD
Kubernetes (Basic:
Pods, Deployments,
Services, and
ConfigMaps.)

Data Engineering (ETL)
Snaplogic
SQL

Languages

English

Hindi

Odia

Telugu

- **Azure:** Virtual Networks, VMs, AKS, App Service, Azure Load Balancer, Azure Key Vault (AKV).
- Maintained reusable infrastructure-as-code libraries that improved deployment speed and consistency across environments.
- **Disaster Recovery (DR) Environment Setup:**
 - Led the design and implementation of a **Disaster Recovery environment in AWS** for a critical application originally hosted on **Azure**.
 - Provisioned DR resources including EC2, RDS, VPC peering, and backup strategies using S3 and automated failover mechanisms.
 - Ensured DR support for both backend and **end-user components**, enabling full business continuity during outages or region failures.
- **CI/CD & Automation:**
 - Developed and managed **Jenkins pipelines** for infrastructure deployment, Ansible execution, and environment validation.
 - Automated configuration of cloud resources and Linux-based instances using **Ansible Playbooks**, significantly reducing manual overhead.
- **Security & DevOps Tooling:**
 - Integrated **CyberArk Safe** and **JFrog Artifactory** for secrets management and artifact handling.
 - Leveraged **GitHub** and **FluxCD** for source control and GitOps-based deployment strategies.
- **Monitoring, Scripting, and Governance:**
 - Created custom scripts using **PowerShell, Python, and YAML** for automation tasks and configuration.

- Basic working knowledge of **Kubernetes**, used in both **Amazon EKS** and **Azure AKS** environments.
- Applied **ITIL practices** and worked in Agile teams using **JIRA** for sprint tracking and issue resolution.

2024-04 -
2023-03

Automation Engineer – Migration Project (Ansible & Ansible Tower)

TCS, Bhubaneswar, India, BFSI Canada (Manulife)

- **Ansible Playbook Development:** Designed and developed **modular Ansible playbooks** for automating infrastructure configuration and application deployment tasks, ensuring reusability and scalability.
- **Version Control with Git:** Managed and maintained playbook versions in a **Git repository**, following best practices for branching, code reviews, and commit standards.
- **Ansible Tower Integration:** Executed and scheduled playbooks through **Ansible Tower**, leveraging its UI and role-based access control (RBAC) features for secure and efficient operations.
- **Environment-Specific Roles:** Created dynamic roles and variable files to support multiple environments (Dev, UAT, Prod) within the same playbook structure.
- **Error Handling and Logging:** Implemented robust error handling and logging mechanisms to ensure smooth and traceable execution.
- **Collaboration and Documentation:** Worked closely with infrastructure and application teams to gather requirements, test deployments, and document automation workflows.

2021-09
2023-01

DATA ENGINEER(ETL)- 1Year

TCS, Bhubaneswar, India, Shutterfly(Communication Media Domain)

- ☐ **Monitoring Production ETL Pipelines:** Regularly analyze and monitor ETL processes in the production environment to identify data issues, performance bottlenecks, or failures.
- ☐ **Issue Diagnosis and Troubleshooting:** Investigate root causes of data discrepancies or pipeline failures by reviewing logs, data flow, and transformation logic.
- ☐ **Collaboration with DBA Team:** Work closely with the Database Administrator (DBA) team to provide detailed reports of issues, proposed logic changes, and necessary data corrections.
- ☐ **Solution Design:** Develop and suggest improvements or logic updates to ensure data integrity, better performance, or to fix identified issues in the ETL process.
- ☐ **Pipeline Logic Updates:** After DBA implements changes in the database or logic, verify and validate updates by rerunning and monitoring the pipeline to ensure proper functioning.
- ☐ **Documentation & Reporting:** Maintain clear documentation of incidents, resolutions, and logic changes for audit, compliance, and future reference.

Education

2021-05 - 2023-04	Master Of Computer Application(MCA) MIET , Bhubaneswar
2018-05 - 2021-05	B.Sc.(Computer Science) Autonomous College, Nayagarh

Organizations Timeline

- TCS (09th DEC 2021 - Current)
-

Accomplishments

- Received recognition from GE leadership team for successfully solving GE Aviation Oasis Trax and OAR interface long running issues.
- Awarded with 'BRAVO' and 'KUDOS' award from TCS for successfully completing and providing GO-Live hyper care for GE aviation Overhaul and AWS projects.
- Received delivery champion from TCS for deploying the R2 user stories to one of the sandboxes independently and resolving the devops issues and also resolving the ongoing data integration issues.
- Received ACE award from TCS for removing the duplicates from the address and accounts data in salesforce cloud data and streamlining the deployment structure.
